

System Features

- De-scale media prevents scale build-up by crystallizing calcium & magnesium (hardness)
- Internal KDF 55 chamber filter / removal of chlorine
- Catalytic carbon / removal of chloramines
- No backwash or drain line required
- Salt free
- Requires no regeneration
- Easy to install
- Electricity is not required
- No TDS is added
- No change in pH
- Upflow configuration to ensure proper fluidization of media
- Includes bypass and union connections that allow for easy servicing

General Specifications	FTP6	FTP8	FTP10
De-scale Media	4 Liters	5 Liters	7 Liters
Catalytic Carbon	1 Cu. Ft.	1 Cu. Ft.	1 Cu. Ft.
Service GPM	6	8	10
Max Iron	0.5 ppm	0.5 ppm	0.5 ppm
Space Required (D x W x H)	10 x 10 x 64	10 x 10 x 64	10 x 10 x 64
Approximate Shipping Weight (lbs)	60	62	64
